

Postdoctoral position is open at Niigata University

We aim to clarify the dynamic neural mechanisms underlying symbolic structuring in non-human primates comparing with those underlying elementary linguistic merge in humans, in collaboration with researchers of multidisciplinary backgrounds. We are seeking for a highly motivated postdoctoral researcher who will be appointed as a Project Assistant Professor for 5 years from April 2025 (Term updated every year; Starting date is negotiable). Applicants must have a PhD degree before April, 2025. The appointed person is expected to play a key role in the non-human primate project with electrophysiological and chemogenetic approaches. Skills in primate animal experiments and/or chemogenetics are preferable, but not necessary. We welcome open-minded researchers who flexibly adapt to our procedures in electrophysiology, cognitive psychology, bioengineering, and neurosurgery. Application of female, foreign, and young candidates expected to obtain PhD or less than five years after PhD acquisition are strongly encouraged. All conditions of employment including salary are in accordance with the regulations of Niigata University. Application will be closed when the position is occupied.

Documents required for application include:

- 1) Curriculum vitae
- 2) List of publications and PDF copies of two representative original papers
- 3) Contact information of 2 referees
